

# Payment Support Guide

## 1. Payment Methods & Security

Secure payment processing is our priority. We use industry-standard SSL encryption and comply with PCI-DSS Level 1 security standards. Never share your payment details via email or chat. Always enter payment information directly on our secure checkout page.

### Accepted Payment Methods:

**Credit/Debit Cards:** Visa, Mastercard, American Express, Discover. 3D Secure verification may be required.

**Digital Wallets:** Apple Pay, Google Pay, Samsung Pay supported for faster checkout.

**PayPal:** Link your PayPal account for secure payments without sharing card details.

**Bank Transfer:** Available for Enterprise customers with payments over \$5,000.

### Adding Payment Method:

Go to Settings → Payment Methods → Add New. Enter complete billing address matching card details. A \$1 verification charge may apply (refunded immediately). Save multiple cards for flexibility. Set primary payment method for auto-renewal.

## 2. Transaction Troubleshooting

Transactions are processed within 2-5 business days. You receive confirmation email immediately after successful payment. Check 'Transactions' in billing for status. Keep confirmation email for records.

### Common Payment Issues:

**Payment Declined:** Check card balance, correct expiry date, and CVV. Contact your bank if issues persist. Some banks flag international transactions.

**Duplicate Charge:** Report immediately at [support@company.com](mailto:support@company.com) with order number and screenshot.

**Slow Processing:** Bank transfers take 5-7 business days. Check bank email for authorization codes needed.

**Wrong Amount:** Verify currency and taxes at checkout before confirming.

### Chargebacks & Disputes:

Initiate refunds through your account dashboard rather than filing chargebacks with banks. Chargebacks incur \$25 fee and may suspend account. For legitimate issues, contact support within 30 days of transaction for immediate resolution.

### **3. International Payments & Currencies**

We support 50+ currencies with real-time exchange rates. Currency conversion happens at payment processing, not bank level (better rates). Multi-currency accounts available for frequent international transactions. Prices shown include applicable taxes.

#### **Currency Selection:**

Select your preferred currency in account settings. Invoice amounts will display in chosen currency. For business payments in different currencies, contact Enterprise support for custom arrangements.

#### **Payment Receipt & Reconciliation:**

All transactions generate itemized receipts downloadable from billing dashboard. Receipts include transaction ID, date, amount, and payment method (last 4 digits). For accounting software integration, use our API to sync transaction data. Technical details available in API documentation.

#### **Payment Support:**

For payment issues:

Email: [payments@company.com](mailto:payments@company.com)

Secure Chat: Available in account dashboard

Phone: 1-800-PAY-HERE (24/7)

Response guaranteed within 2 hours
