

Login Support Guide

1. Account Login Basics

Login is the process of accessing your account with valid credentials. Users can log in using their registered email address and password. We support single sign-on (SSO) via Google, Microsoft, and GitHub for added convenience. Always ensure you are on the official website before entering credentials. For security, never share your login information with anyone, including support staff.

Common Login Issues:

Incorrect Password: Check if Caps Lock is enabled. Password is case-sensitive. Use the 'Forgot Password' link to reset.

Account Locked: After 5 failed login attempts, your account is temporarily locked for 30 minutes. This is a security measure.

Email Not Found: Verify you registered with the correct email. Check for typos or try recovering your account using alternative email.

Password Requirements:

Passwords must be at least 8 characters long and include: uppercase letters (A-Z), lowercase letters (a-z), numbers (0-9), and special characters (!@#\$%^&*). Avoid using dictionary words or personal information like birthdays or names.

2. Password Recovery & Reset

If you forget your password, click 'Forgot Password' on the login page. Enter your registered email address. You will receive a password reset link via email within 5 minutes. The link is valid for 24 hours only.

Step-by-Step Password Reset:

1. Click 'Forgot Password' on the login page
2. Enter your registered email address
3. Check your email (spam folder if not in inbox)
4. Click the reset link provided
5. Create a new password meeting all requirements
6. Log in with your new password

Two-Factor Authentication (2FA):

For enhanced security, enable 2FA in account settings. You'll receive a code via SMS or authenticator app during login. Keep your phone number updated in account settings. Save backup codes in a secure location in case you lose access to your authenticator.

3. Account Security & Troubleshooting

Protect your account by updating your password every 90 days and never reusing old passwords. Log out from untrusted devices and clear browser cache regularly. Enable notifications for login alerts in account settings.

Browser Compatibility:

Login works best on Chrome 90+, Firefox 88+, Safari 14+, and Edge 90+. Clear cookies and cache if experiencing issues. For mobile access, use our native apps available on iOS 12+ and Android 8.0+.

When to Contact Support:

Contact us if:

- Your account is locked and 30 minutes have passed
- You don't receive password reset email (check spam)
- You suspect unauthorized access
- Login page shows error messages
